

GROWING IN LOVE

WITH THE 12 KEYS

GUEST SPEAKER: JOHNSONKEYZ

WEBINAR CONVENER

BAYO-DAVID OLUWATOBILOBA

- ★ Nothing in this world can take the place of persistence.
- ★ Talent will not; nothing is more common than unsuccessful people with talent.
- ★ Genius will not; unrewarded genius is almost a proverb.
- ★ Education will not; the world is full of educated derelicts.
- ★ Persistence and determination alone are omnipotent.

- ★ The slogan 'press on' has solved, and always will solve, the problems of the human race." -Calvin Coolidge
- ★ Success consists of going from failure to failure without loss of enthusiasm. -Winston Churchill
- ★ "Nothing great has ever been achieved without enthusiasm."-Ralph Waldo Emerson
- ★ "If you think you can do something, or if you think that you cannot do it, you are right." -Henry Ford
- ★ "Joy does not come from what you do, it flows into what you do and thus into this world from deep within you." - Eckhart Tolle
- ★ Never, never, never give up. -Winston Churchill

We Are in the Love season and we want to extend that to our Instrument not because we don't love our instrument before but because we want to Grow in Love. What does it mean to Grow in Love in our context... means taking it Deeper... digging deeper...leaving the general surface level for the internal level. Taking what deeper??? The Relationship between who and who. Between A Man and

his/her instrument.

GROWING IN LOVE WITH THE 12 KEYS

Sometimes I do wonder why I had to take time before accepting the fact to learn all keys. Then overtime after looking back I discovered what really caused that. And it's the fact that I thought I loved the Piano before..yeah I did.. but then maybe it wasn't enough. But at some point something stronger than the initial Drive Came up. And by that time Learning to play all the keys became so easy even with the mental stress behind it. Love conquers all!

Brethren there is no much peace and Joy as that of a musician who could easily manipulate the whole keyboard without remembering that there is a button Called Transpose. The Main message tonight is Love when the Love is there Brethren the rest is story. I've seen players who are so so free and have all the time to yourself and they still transpose and I've seen Bankers/Barristers /Medical students who are so so busy and they play on all

Keys. The issue is not about Time. **IT IS LOVE** which then brings up the Passion which then brings up the Focused and Strict Practice which will now bring about the expected result.

So, it that when I was not playing on all keys, the reason wasn't because I didn't have time but it's simply Lack of Passion, Low level of Love to decipher to the Keys. But then someone could have met me on the road and told me that. I would have argued that He/She is wrong. but please who is actually wrong???

I often tell myself something long time before now

Why start a journey when I won't actually hit a noticeable point/level in the Journey?

If I have to run after the transpose button every time I want to modulate. Why call myself a Pianist, why play the Piano. Am I not looking like a Joker? Why will all my friends be better than I am, and I'll feel comfortable!! while encouraging myself with words like I'm more busier than

they are!!! Why will a medical student play better than I do.
Is that still Talent or Hardwork?

And that's where the Turning Point comes in. **Hardwork beats Talent when Talent refuses to work**

Haven't you seen where a so called music student will be transposing and a student of accounting will be playing all keys?

Talent will surely work because its named 'talent'. But not all Talented players graduate from the Talent level to the Hard work level not until Loves enters the matter. That is why some players who never had the Talent from inception still play better than some players who have been there since childhood

Love comes first and it's calls for Passion/Hardwork

Let me share my first gift at this point

Fingerings for all major scales in all keys and I want to encourage as many people that can't play the scales in all

keys to take it as a point of duty to conquer that now Right Practice brings about Perfection. Practice doesn't necessarily bring about perfection, but Right Practice brings about Perfection.

To improve playing in different keys, first and foremost you need to know all your piano scales. Scales are the foundation for all of piano playing and for a good technique. You need to bring all of them to the same level. I recommend practicing all of them with a metronome at the start of each day's practice session. If you have difficulty with one, stop and concentrate on it alone until it is perfect at whatever tempo you can play it with perfect evenness in terms of rhythm, dynamics and tempo.

Next, make sure you know all the major, minor and dominant seventh arpeggios in all keys. This isn't quite as daunting a task as it may seem, since many of the patterns are identical. For instance, if you know the C major arpeggios, then you should also be able to play F major, G

major, D minor, E minor and A minor equally well, since they are also played using only the white keys. In these cases, the keys change but the pattern for the fingers is identical

You should learn all inversions of each arpeggio once you're comfortable with the arpeggios in root position. Chords have as many positions as they have more notes. For instance, a C major triad has three notes (C, E and G) and hence three positions: root position (C on the bottom), first inversion (E on the bottom) and second inversion (G on the bottom). Again, learning chord inversions and practicing them as arpeggios (broken chords) isn't as difficult a task as it may seem. Once you learn a few, you'll quickly be able to play the rest as well

Finally, learn the common chord progressions and transpose them into each key. This will require considerable practice, but once you've learned the most common chord progressions in each key—along with your scales and arpeggios—playing any piece/any song in any

key will no longer be a problem! Now let's not get scared by the grammars. It's just like how hard it looks when one is learning how to drive. But the truth is by then time you get the gist you won't need to remember all the grammars again to pull any stunt

Thats an audio for how your dominant Chord will sound what's the formula for a dominant 7th chords that is **1-3-5-b7**

So, if I'm in key of a A major which has the major note **A,B,C#,D,E,F#,G#,A** which also means **1,2,3,4,5,6,7,8** just pick the 1-3-5-7 notes A C# E (and diminish the G# by a semitone so it comes back on G) dat is A C# E G. If you look at the dominant 7th chord on D, E and A, you will discover that they have the same shape like I said earlier. The Piano becomes easy when the Love comes in. If you don't love, how will you get to know better, to discover the simple tricks in what you think is hard?!

The Major 7 chord is the most simplest on the Piano (1-3-5-

7) this is the trick. After picking 1-3-5 in any key instead of getting confused just pick the 1 on the higher octave and lower it down a semitone that's the major 7. So, even in the hardest key if there is any to pick the Major 7 chord is very easy.

Love bring about Research for what/who I claim I love, then I begin to discover new things. But when I don't love, I will care less or don't care at all!! ***Love Grows overtime.*** That's Same for the Piano; while loving more you keep knowing more.

Love More and Enjoy Knowing More

Other E-books (Same Author)

Notalph

Outside the box ideas specially for you! to keep your musical lines fresh and uniquely yours. Lots of testimonies about notes created through the use of Notalph, and Nexus of Notalph and Modes. Be the one to teach your friends.

Creating Sweet Melodies

When it comes to creating sweet melodies, masters of the craft seem to do this flawlessly. But for beginners? It's usually a tug of war. This book attempts at explaining how to create sweet melodies for beginners and those willing to understand it better through the use of tonic solfa and a simple/known song!

FIXit Bass Clinic

A compilation of the topics treated at Fixit bass clinic, was organised by Infinite Field of Ideas. Topics compiled were under the following headings

- Things to Check out for when buying a bass guitar
- Having a good tone
- Equaliser settings and How to apply simple chords to praise jams
- How to improve on Weak Pinkie fingers
- Music approach and better ways to practise playing the bass guitar.
- Etc

Bass-ic Talks

A diagrammed-based beginner bass book, written for those who wanted to work through the fore of bass education, or for teachers who are busy to walk their students through. It is garnished with side Tips, and footer quotes. A must have for up and coming bassists!!
